## Summary

Security operations professional with **4+ years** across managed security services, fintech, and enterprise environments. Experience in **IBM QRadar** administration, high-volume alert investigation, phishing response, endpoint containment, and DLP operations. Investigated **80-100 alerts per day at peak** at TSYS; currently handles incident response and privacy-related escalations at **Eviden (Atos Group)**. CompTIA Security+ and AWS Certified Cloud Practitioner certified, with hands-on exploration of AI-assisted application development.

## Experience

### Consultant, Security Operations | Eviden (Atos Group)

February 2025 - Present | Pune, India (Remote)

- Investigate **4-5 phishing cases per month** using **Microsoft Defender for Office 365**, documenting findings, coordinating containment and remediation, and escalating confirmed privacy-related cases to the Privacy team.
- Coordinate incident handling from alert review through closure, working with relevant teams to investigate suspicious activity and complete authorized containment and remediation actions.
- Execute endpoint quarantine and controlled release through **CrowdStrike Falcon**, following investigation findings and required management authorization.
- Manage **Trellix (McAfee) DLP** alerts and bypass requests by validating business justification with relevant teams and completing approved actions.
- Prepare a **monthly operational matrix** covering incidents, alerts, and service tickets, consolidating case data for management review and trend visibility.

### Information Security Analyst | TSYS Card Tech Services India Pvt. Ltd.

August 2022 - February 2025 | Pune, India

- Investigated **80-100 security alerts per day at peak** by correlating endpoint, firewall, Windows, and IPS/IDS activity through **Splunk** and supporting security tools, documenting findings and escalating suspicious activity.
- Analyzed suspicious files, URLs, and indicators using **Joe Sandbox, Carbon Black, and Recorded Future** to support threat validation and coordinated response.
- Performed authorized endpoint quarantine and return to service through **Carbon Black Cloud**, coordinating high-impact containment actions with management.
- Improved daily **Goal-Task-Action (GTA)** task allocation and ownership tracking, helping reduce duplicate investigation effort and strengthen analyst accountability.
- Documented access-creation procedures and shared recurring false-positive findings with the SIEM administration team to support alert tuning and consistent operational workflows.

## Experience

### SIEM Platform Associate - Security Platform Engineering | SecurityHQ

February 2022 - August 2022 | Pune, India

- Supported **IBM QRadar** operations within an MSSP serving **150+ enterprise customers**, contributing across assigned client environments through log-source troubleshooting, scheduled reporting, and platform issue resolution.
- Investigated **non-reporting log sources** by diagnosing connectivity and service issues and coordinating resolution with relevant teams to restore log visibility.
- Delivered **daily, weekly, and monthly reports** from **IBM QRadar** to provide clients and management with visibility into security events and platform status.
- Supported **24x7 SOC operations** through QRadar health checks, service troubleshooting, and escalation of platform issues according to established procedures.

## Projects

### Orbit | AI-Assisted Application Prototype

September 2026 | Personal project

- Developed an interactive prototype in approximately **10 days** by defining requirements, directing AI-assisted development with **Claude Max**, and iterating on dashboard layouts and user workflows.
- Combined **6 tracking areas** - goals, habits, tasks, finance, journaling, and wellbeing - with manual data entry and basic cloud persistence. Demonstrated workflows with sample data; in-app AI and external integrations remain planned.

### Personal Portfolio | richesh.top

Personal project

- Created and deployed a professional portfolio through **Vercel**, configured a custom domain and DNS, and showcased cybersecurity experience and the Orbit prototype.

## Skills

**Security operations:** Incident investigation, alert triage, escalation, containment coordination, phishing analysis, IOC enrichment, DLP review, operational reporting.

**SIEM:** IBM QRadar, Splunk Enterprise Security / Splunk Cloud, Microsoft Sentinel; platform health checks, log-source troubleshooting, scheduled reports, tuning feedback.

**Endpoint and email:** CrowdStrike Falcon, Carbon Black Cloud, Microsoft Defender for Office 365, Proofpoint TAP/POD, Cofense PhishMe, Joe Sandbox.

**Threat intelligence, cloud and data protection:** Recorded Future, Red Canary, Prisma Cloud, AWS, Trellix DLP, Symantec DLP, Google Workspace Admin.

**Systems and workflow:** Windows Event Logs, Linux CLI, PowerShell, Jira, ServiceNow, ITIL incident / service request / change processes.

**Developing skills:** AI-assisted prototyping, Python scripting, workflow automation, OWASP Top 10 for LLM Applications, MITRE ATLAS.

**Certifications:** AWS Certified Cloud Practitioner (CLF-C02), Aug 2024 - Aug 2027; CompTIA Security+ (SY0-601), Oct 2023 - Oct 2026.

## Education

### Bachelor of Computer Applications (BCA)

Swami Ramanand Teerth Marathwada University, Nanded  
2018 - 2021 | Grade: A+
